airspace

on-demand customizable air pillows

systems

THE AIRSPACE PILLOW PACKAGING SYSTEM PROVIDES A SOURCE FOR ON-DEMAND PRODUCTION OF CUSTOMIZABLE AIR PILLOWS THAT CAN BE USED FOR VOID-FILLING, CUSHIONING, AND BLOCKING AND BRACING. THE DURABLE, LIGHTWEIGHT PILLOWS ARE RE-USABLE, CLEAN, ECONOMICAL AND RECYCLABLE.

KEY FEATURES

FEATURES	ADVANTAGE	BENEFITS
Internal air supply	Portable, no compressor	Quiet machine, reduced maintenance, reduced cost, less warehouse space required
Adjustable pillow length	Increased package flexibility	Reduced labor and material cost
High output speed	Fast speed for quick replenishment	Improved efficiencies
Portable stand	Machine can easily be moved	Can be easily used in many different packaging stations
Pillow perforation with full option	Customizes packaging process	Lowers labor cost, decreases repetitive motion/cut
Quiet operation	Reduces excessive noise in workspace	Improves work environment
End of roll alarm	Reduces down time	Increased efficiencies

AirSpace uses centre folded roll-stock which allows you to form your own pre-set bag sizes, reducing cost while creating short lead times. There are up to 8 pre-set lengths so you can change sizes instantly, increasing ease of operation and labor savings.

TARGET MARKETS

Target markets include: Computer accessories, Books/publishing, Electronic equipment, Cosmetics/pharmaceuticals, Sporting goods.
